

Optimize Workplace Safety with Device Magic

Every seven seconds, one of the 130 million workers employed at one of 8+ million worksites around the United States is injured. That translates into 12,600 injuries each day, 88,500 per week and 4.6 million every year. Device Magic mobile inspection forms help minimize and prevent these numbers by making processes like *conducting safety inspections, completing incident reports, maintaining OSHA compliance and optimizing risk audits* simple, yet powerful.

Create straightforward checklists & inspection forms for any industry in minutes. Gather & analyze data on which injuries are most common, which groups are most prone to accident & when equipment requires maintenance. Device Magic users report a **30% increase in compliance**.

Mobile safety checklists and inspection forms shave 7 hours off of inspection time on average. In a recent study, they also led to a **>30% increase in the number of inspections performed**.

Scale back this number by immediately collecting & delivering accurate information, identifying the root cause of incidents & establishing better overall safety systems. On average, utilizing mobile forms has resulted in **23% fewer incidents**.

OSHA requires work-related injury and illness records to be maintained for at least 5 years. The Device Magic Dashboard allows you to reference, review and analyze your secure data whenever and wherever you want.

Device Magic mobile forms help customers, suppliers and staff communicate **at least 10x faster**, minimizing incident response time and preventing future accidents. **71% of customers** report gaining access to accurate data sooner while simultaneously lowering operational costs.

Take your team's safety to the next level.
