of businesses plan to use mobile forms more in the next year.

Why our customers chose Device Magic's mobile forms.

"Device Magic helped us to reduce a lot of paperwork. Instead of our employees carrying 5-7 different paper forms around they use their phones. It also gives office staff immediate responses, which means we can work at our own pace and not wait for the forms to be mailed in from our different locations."

"We tried numerous other solutions before Device Magic. Yours was the most user friendly and the functions are ideal for what we require."

"I picked Device Magic because of the offline feature and the ability to save photos. We've found more and more ways to integrate the tool into our processes and it is now a big part of our daily routines."

"There's a reason I like Device Magic so much; it just always works. For any issue that I've ever had there's always a lot of attention. If you have any questions, in five minutes someone is chatting to you helping you fix it. For me, that was really very positive."
